Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Due to the below summarized issues, the suspension, mailed 10/26/01, is hereby withdrawn.

Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. Upon reconsideration, the following rejections and/or objections are newly applied. They constitute the complete set presently being applied to the instant application.

NEW MATTER

Claims 36 and 40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Consideration of the entire disclosure as filed has failed to reveal written basis for the generic PCR products as cited in instant claims 36 or 40 which therefore is NEW MATTER.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 1631

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17, 23, 33, 35-37, 39, and 40 are rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by Stavrianopoulos et al. (P/N 4,994,373).

Example 1 in column 8 of the reference discloses the treatment of a glass support with a silane linker for covalent linkage of single stranded DNA, reasonably an oligonucleotide, thereto to form an array for hybridization usage. In column 8, lines 40-45, the description of "various" single stranded analytes, including mutated gene fragments as in instant claim 19, for such hybridization is reasonably interpreted as being "different" oligonucleotides as instantly claimed. The depressions or wells are clearly known locations also as instantly claimed. It is well known that glass itself is impermeable as instantly required even though it may be macroscopically porous. Microtiter plates as utilized in the reference have 96 wells thus also anticipating the claim 18 different oligonucleotides limitation. See example 7 in column 12. Claims 23 and 24 and equivalents are included due to these claims being directed to product by process type subject matter which is not deemed to distinguish over the basic array claims subject matter. Fluorescent labels are cited in column 3, lines 37-43, as also in instant claim 75 as are radioactive practice in column 3, lines 56-64, as in instant claim 76.

CLAIM OBJECTIONS

Claims 18-22, 24, 25, 34, and 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 26-32 are allowed.
